# Luis Alberto Becerril Moralez

Full Stack Developer

México, México City | +52 5617095015 | bcdld@hotmail.com | Portfolio | LinkedIn | GitHub

---

Full Stack Developer specialized in Back-end development. Experienced in building event-driven applications using technologies such as Kafka, Python, FastAPI and PostgreSQL. Skilled in Front-end development with React, Redux, Tailwind, Typescript and modern UI components libraries such as Material UI, Chakra UI and Bootstrap. Also experienced in working with agile methodologies like SCRUM and development tools including AWS, Git, GitHub, as well as managing SQL and NoSQL databases like MySQL, MongoDB and Linux environments. English: C2 Level.

## PROFESSIONAL EXPERIENCE

**Sofware Engineer** October 2025 – October 2026
Coders Link

- Developed and maintained features for an enterprise e-commerce platform using Next.js with Typescript and Chakra UI, as well as NestJs and Nginx for request distribution in a microservices architecture through webhook chains.
- Implemented endpoints for product queries with recommendation system based on product history, payment history storage, and scheduled tasks (cron jobs) for automated management of fiscal documents in AWS S3.
- Collaborated as part of an agile team following the SCRUM methodology with sprints, daily stand-ups, and retrospectives to ensure continuous delivery of features.

**Full Stack Developer** June 2024 – October 2025
Muhami Consulting Firm

- Collaborated in the development of an internal tool for a TV company using React, FastAPI, SQLAlchemy, and Kafka in an event-driven architecture following the Domain-Driven Design (DDD) principles.
- Assisted in translating client requirements and business logic into application functionalities, ensuring the system met the specific business needs.
- Collaborated in an agile team using the SCRUM methodology, participating in sprints, daily stand-ups, and retrospectives to ensure the effective delivery of features.

## PROJECTS

**Full Stack Web Developer – My Sounds**
Personal Project

An application designed as a sound bank where users can register and manage their audio files. It features AWS integrations using S3 for storage and Elastic Beanstalk (EC2) to host the NestJs-based backend, PostgreSQL as the database, and Drizzle as the ORM. Implemented payload validation trough class-validator and rate limiting at global, IP, and endpoint-specific levels to prevent API abuse. The frontend is hosted on Vercel and built with ReactJs using Material UI components, incorporating multilanguage support and responsive design for proper display on any device. The entire system includes automated CI/CD pipelines using GitHub Actions for both the frontend and backend.

**Front:** React and Material UI
**Back:** NestJs, Drizzle and Typescript
**Database:** PostgreSQL
Repository

**Full Stack Web Developer – Questie**
Academic Experience, Henry Bootcamp

Developed an online learning platform with diverse course topics, some requiring platform points that could be purchased via Mercado Pago or PayPal. Features included payment history, admin dashboard and capabilities to manage courses, modules and lessons, and periodic email notifications using cron jobs.

**Front:** NextJs, Tailwind and Custom CSS
**Back:** NestJs, TypeORM and Typescript
**Database:** PostgreSQL
Repository (Back)
Repository (Front)

## TECHNOLOGIES

- HTML & CSS
- Javascript
- Typescript
- Python
- NodeJs
- React
- Express
- FastAPI
- NestJs
- MongoDB
- PostgreSQL
- Linux
- Git & GitHub
- SCRUM
- Material UI
- Chakra UI
- Drizzle
- AWS

## EDUCATION

- **Bachelor's Degree in Informatics**
  Universidad Nacional Autónoma de México (UNAM)
  *2024*.

- **Full Stack Web Developer**
  Henry Bootcamp. Completed 800 hours of theoretical and practical course.
  *2024*.

## CERTIFICATIONS

- EF SET 71/100 (C2 Proficient) English Link
- Henry Bootcamp Fullstack Developer Certificate Link

## LANGUAGES

- English: Advanced (C2)
